

# Frame & Truss Manager

posted: 15/12/2021

Advertised Internally & externally

Our Frame & Truss factory needs a person with experience on their side to manage the day to day operations of our timber and steel production lines at Geebung.

## About the role

The Frame & Truss Manager will be there to ensure delivery and quality targets are met while also ensuring productivity is maximized by driving change through processes and procedures. Your ability to build relationships with clients and suppliers as well as your experience managing staff will set you apart in this dynamic role.

## Key accountabilities

- Oversee daily running of the business including liaising with production, estimating and detailing teams
- Stock control and machine maintenance
- Provide a high level of customer service for both current and new customers
- Technical support where required
- Quoting as required
- Problem solve issues where required

## About you

To succeed you will have experience as a production manager or supervisor who can oversee the detailing and production teams and general day to day running of the steel and timber business. You must have a positive attitude and want to work with customers and your team as well as:

- Sound knowledge of roof truss and wall frame or general production environments
- Excellent communication skills
- Self motivated to achieve task in a timely manner
- Good people person, enjoy staff and customer contact
- Positive leader
- Pryda or Scottsdale knowledge would be beneficial not essential
- Good computer skills

## Benefits

In return you will receive a competitive salary and a welcoming and dynamic working environment and flexible working arrangements.

Applications in writing to the Chief Operating officer, Lewis Rolls on or before 28/01/2022.
