

Anchoring Capsules

Key Features

- 1 capsule = 1 fixing
- Ideal for overhead fixing
- No mixing, no mess, no waste
- ETAG-001-5 Option 7
- Submerged applications

**NO MIXING NO MESS
NO WASTE**

Maxima™ glass capsules are the ideal solution for jobs with only a few fixings where an injection product would be wasted. Maxima™ glass capsules non-sag and rapid setting features make them the best solution for anchoring overhead and in soffit.

The glass breaks during installation and scours the walls of the borehole to create a strong secure bond in adverse conditions such as improperly cleaned, core drilled or flooded holes. They can even be installed underwater.

Maxima™ capsules are certified for 50 year design life under sustained loading.

Ideal for structural steel, hand rails, balustrades, cable trays, mechanical services,

Advantages

- The ideal overhead solution
- Certified High load performance
- One capsule = one fixing = no waste
- 50 year design life in sustained load applications
- Suitable for flooded and core drilled holes
- Rapid setting for high productivity

Typical Applications

- Fabricated steel connections (Hand rails, Gates, Fence posts, Balustrade posts)
- Structural Steel connections

Approvals

Certification	Approval Number / Report Number
European Technical Approval ETAG 001-5 Option 7	ETA 03/0008 0679-CPR-0011

LOAD RANKING*

Rebar Size Range - N/A

Threaded Bar Size Range - M8 to M24

Installation
Temperature
Range

Adhesive
-5°C to 35°C

Substrate
-5°C to 35°C

Anchoring Environments

Hole Condition	 Drilled holes  Cored holes  Flooded holes
Anchoring Environment	 Dynamic loading
Substrates	 Solid Concrete
Operating Temperature Range	<div>Long Term:</div>  -40°C  50°C <div>Max Short Term:</div>  80°C

Working and Loading Times

Substrate Temperature	Working Time	Time to Full Load Capacity	
		Dry and Damp	Flooded and Underwater
-5 to 0°C	-	5 hours	10 hours
0 to 10°C	-	60 minutes	120 minutes
10 to 20°C	-	30 minutes	60 minutes
>20°C	-	20 minutes	40 minutes
